Brief Methodology

The CPI measures the average change over time in prices of goods and services consumed by people for day-to-day living. The construction of the CPI combines economic theory, sampling and other statistical techniques using data from other surveys to produce a weighted measure of average price changes in the Nigerian economy. The weighting occurs to capture the importance of the selected commodities in the entire index. The production of the CPI requires skills of economists, statisticians, computer scientists, data collectors and others.

Key in the construction of the price index is the selection of the market basket of goods and services. Every month, 10,534 informants spread across the country provide price data for the computation of the CPI. The market items currently comprise of 740 goods and services regularly priced.

The first stage in the calculation of the CPI is the collection of prices on each item (740 goods and services) from outlets in each sector (rural or urban) for each state. Prices are then averaged for each item per sector across the state. The next step is to use the average price to calculate the basic index for each commodity: The current year price of each commodity is compared with a base year's price to obtain a relative price.

Next we use the Laspeyres formula to compute an aggregated index for each class (which has a multitude of commodities which have similar consumption purposes): Here the sum of the product of weights (obtained from the expenditure survey) and relative prices for each item is divided by the sum of the weight of the items in that class, and the result multiplied by 100 gives the required index number. This index number is still classified according to the urban or rural classification sector for each of the 36 states and the FCT. This yields 85 classes then 48 groups which are then reclassified into 12 Divisions to derive:

1. The country composite index
2. The Urban National index
3. The Rural National index
4. The Combined Urban and Rural State Composite index

The survey methodology generates 3774 all items indices for all states and the FCT.

This edition of the Statistical News contains the revised Consumer Price Index (CPI) based on Nigeria Living Standard Survey (NLSS) 2003/2004. The consumption expenditure data were re-valued to November 2009, which is the base period for the revised CPI.

The May 2003 and September 1985 based indices are being continued using factors derived from the new CPI. These indices will yield the same price change for any commodity group contained in all the series.

A new sub index – Imported Food Index- is available in the revised CPI.

Note: The urban and rural indices were weighted with the ratio of their populations to the national i.e. 0.455 and 0.545 respectively to compute the composite indices at the 12 Classification of Individual Consumption by Purpose (COICOP) functions and all items levels. This may cause variance between a recalculated all items index using the weights published on table 2 and the published all items index because the published weights were computed only from consumption expenditure survey result.The following breakdown highlights a non-exhaustive listofthe components of thecurrent CPI:

The following breakdown highlights a non-exhaustive list of the components of the current CPI:

FOOD AND NON-ALCOHOLIC BEVERAGES						
	Food	Bread and cereals	Meat	Fish	Milk, cheese and eggs	Oils and fats
						
	Fruit	Vegetables	Potatoes, Yam & other tubers	Food products n.e.c	Coffee, tea and cocoa	Soft drinks
						
	Spirits	Wine	Tobacco	Narcotics		

CLOTHING AND FOOTWEAR

Clothing materials, other articles of clothing

Garments

Cleaning, repair and hire of clothing

Shoes and other footwear

Repair and hire of footwear

Actual and imputed rentals for housing

Water supply

Miscellaneous services relating to the dwelling

Electricity

HOUSING, WATER, ELECTRICITY, GAS

Gas

Liquid fuel

Solid fuels

Furniture and furnishings

Carpets and other floor coverings

Repair of Furniture

Household textiles

FURNISHINGS, HOUSEHOLD EQUIPMENT

Major household appliances whether electric or not

Repair of household appliances

Glassware, tableware and household utensils

Non-durable household goods

Domestic services and household services

HEALTH

Pharmaceutical products

Medical services

Dental services

Paramedical services

Hospital services

TRANSPORT				
	Motor cars	Motor cycles	Bicycles	Vehicle spare parts
				
	Fuels and lubricants for personal transportation	Maintenance and repair of personal transport	Passenger transport by road	Passenger transport by air
				
				Passenger transport by sea and inland waterways

COMMUNICATION			
	Postal services	Telephone and telefax equipment	Telephone and telefax services
RECREATION AND CULTURE			
	Audio-visual, photographic and information processing equipment	Photographic development	Musical instrument
			
			Recreational and sporting services
			
			Games of chance

EDUCATION		
	Books & stationery	
RESTAURANTS AND HOTELS		

MISCELLANEOUS
GOODS AND
SERVICES

All Items Index

The Consumer Price Index (CPI) which measures inflation increased by 17.24 percent (year-on-year) though at a slower pace in April 2017, 0.02 percent points lower from the rate recorded in March (17.26) percent. This is the third consecutive month of a decline in the headline CPI rate, exhibiting effects of some easing in already high food and non-food prices, as well as favourable base effects over 2016 prices. Increases were recorded in all COICOP divisions that yield the Headline Index. The top items to have recorded the highest year on year increases across all the divisions were Solid Fuels, Bread and Cereals, Meat, Liquid Fuels, Clothing materials, other articles of clothing and clothing accessories, and Fish.

On a month-on-month basis, the Headline index increased by 1.60 percent in April 2017, 0.12 percent points lower than the rate recorded in March. On a month on month basis, the highest rise in prices were dominated by food items including coffee, tea and cocoa, potatoe, yam and tubers, bread and cereals, milk cheese and eggs and meat and fish.

It should be noted that the Headline Index is made up of the Core Index and Farm Produce items. As. Processed Foods are included in both the Core and Food sub-indices; this implies that these sub-indices are not mutually-exclusive.

The Urban index rose by 17.62 percent (year-on-year) in April from 18.27 percent recorded in March, and the Rural index increased by 16.69 percent in April from 16.47 percent in March.

On month-on-month basis, the urban index rose by 1.61 percent in April from 1.76 percent recorded in March, while the rural index rose by 1.59 percent in April from 1.69 percent in March.

The corresponding twelve-month year-on-year average percentage change for the urban index increased from 18.79 percent in March to 18.98 percent in April, while the corresponding rural index also increased from 16.05 percent in March to 16.69 percent in April.

COMPOSITION OF THE MAJOR INDEX AND SUB-INDICES

All Items = Farm Produce + Core index

Food = Farm Produce + Processed Foods

Core = All Items – Farm Produce

Food Index

The Composite Food Index rose by 19.30 percent in April 2017. On a month-on-month basis, the Food subindex increased by 2.04 percent in April, down by 0.17 percent points from 2.21 percent recorded in March. The rise in the index was caused by increases in prices of bread, cereals, meat, fish, potatoes, yams and other tubers, coffee, tea and cocoa, milk cheese and eggs and oils and fats

The average annual rate of change of the Food sub-index for the twelve-month period ending in April 2017 over the previous twelve-month average was 17.11 percent, 0.51 percent points from the average annual rate of change recorded in March (16.60) percent.

All Items Less Farm Produce

The "All Items Less Farm Produce" or Core sub-index, which excludes the prices of volatile agricultural produce eased by 14.80 percent during the month, 0.60 percent points from 15.40 percent recorded in March as all key divisions which contributes to the index increased.

On a month-on-month basis, the Core sub-index increased by 1.10 percent in April, 0.22 percent points lower from 1.32 percent recorded in March. The highest increases were recorded in Solid Fuel, Liquid Fuel, Clothing materials and other articles of clothing, Lubricants for personal transport equipment, Audiovisual, photographic and information processing equipment, Wines and Spirits.

COFFEE, TEA AND COCOA

YAM AND TUBERS

BREAD AND CEREALS
